## GROUPE LACASSE CASEGOODS CONTRIBUTIONS TO LEEDv4

Groupe Lacasse products may contribute to credits of the LEEDv4 rating systems. Products that help obtain credits will assist you in achieving your green building goals. LEED is a building rating system and provides a framework for sustainable design; therefore, LEED criteria are supported by the ways in which products are used and applied to building projects.

### MATERIALS AND RESOURCES (MR)

**MR Credit: Interiors Life-Cycle Impact Reduction** **1 point**

The flexibility, modularity, and quality of products allow reuse and will adapt to new needs, contributing to this point for future projects.

**MR Credit: Building Product Disclosure and Optimization** **1 point**

Groupe Lacasse products contain a high percentage of recycled content, and our laminate chain-of-custody features FSC controlled wood.

**MR Credit: Construction and Demolition Waste Management** **2 points**

The packaging of furniture is primarily made of easy to recycle materials (Corrugated cardboard, polyethylene film, honeycomb cartons, wood frames).

### INDOOR ENVIRONMENTAL QUALITY (EQ)

**EQ Credit: low-emitting materials** **1 point**

Double Greenguard certified for low emissions. Low-emitting products reduce emission during construction and flush-out.
