

**GROUPE LACASSE
CASEWORK
HAS...**

- **New FUZE edge laser technology** to create a permanent edgeband and microbial seal that completely blocks out external contamination;
- **No seams, peeling edges or exposed substrates, even on backs and under the surfaces;**
- Thermally fused laminate which is bonded to the substrate and **will not chip or delaminate;**
- 135° heavy-duty hinges;
- **25-year warranty;**
- Ease of being **completely reconfigurable;**
- Easy installation - ships assembled;
- **Parametric sizing**, built to fit any dimension;
- Prices **comparable to or lower** than healthcare-grade millwork.

GROUPE LACASSE
MODULAR CASEWORK
WITH FUZE EDGE

Seamless edges.

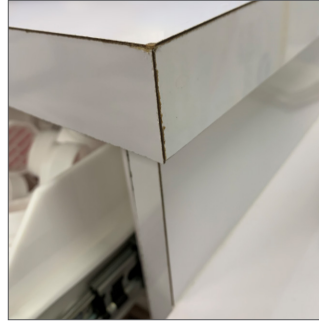

FUZE edges will not peel.

135° heavy-duty hinges with no exposed substrate.

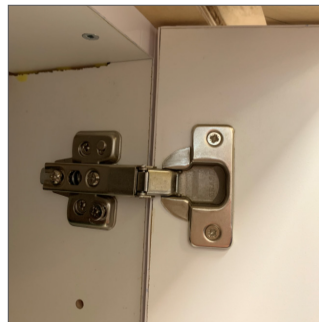

HOSPITAL PHARMACY:
4-MONTH OLD
TRADITIONAL MILLWORK

Seams create entry points for foreign substances.

Peeled edges are unsanitary and unsightly.

Exposed substrate risks contamination. 90° - 110° hinges break easily.

**TRADITIONAL
MILLWORK
HAS...**

- Seams;
- Edges that peel;
- Exposed substrates;
- Laminate that is highly susceptible to chipping and delaminating over time;
- 90° - 110° hinges;
- 1-year warranty;
- No or limited possibility to reconfigure.

+

Proper casework can aid in infection prevention.
