

Quality and Environmental Policy

Groupe Lacasse commits to the ongoing satisfaction of its clients and to the respect of deadlines. By the means of our policy, we ensure:

- the satisfaction of our clients, our dealers and our members;
- continuous improvement in the pursuit of excellence;
- compliance with rules and other regulations to which we subscribe;
- the review of our performance to meet or exceed quality standards aimed to satisfy our clients.

Our environmental policy is designed to make our organization a reference in the field of sustainable development using manufacturing processes that will not compromise the quality of life of future generations. It is therefore our responsibility to apply the philosophy of sustainable development during all stages of our processes.

This philosophy is detailed in our « Sustainable Development Policy » document.

The intranet/internet version prevails over the printed version.
