

DATE: February 23rd, 2018

SUBJECT: **LACASSE METAL STORAGE FURNITURE TO LEED® V4**

Groupe Lacasse products contribute to credits of the LEED v4 rating system. Products that help obtain credits will assist in achieving green building goals. LEED v4 is a building rating system which provides a framework for sustainable design; therefore, LEED v4 criteria is supported by the ways in which products are used and applied to building projects.

MATERIALS AND RESOURCES (MR)

MR Credit: Interiors Life-Cycle Impact Reduction

1-4 points

The flexibility, modularity, and quality of products allow reuse and will adapt to new needs, contributing to this point for future projects.

MR Credit: Building Product Disclosure and Optimization

1 point

All metal storage furniture is made out of cold-rolled steel.
27.3% post-consumer recycled content and 40.6% post-industrial recycled content.

MR Credit: Construction and Demolition Waste Management

1-2 points

The packaging of furniture is primarily made of easy to recycle materials (corrugated cardboard, polyethylene film, honeycomb cartons, wood frames).

INDOOR ENVIRONMENTAL QUALITY (EQ)

EQ Credit: Low-Emitting Materials

1-3 points

GREENGUARD GOLD Certification for low emissions. Low-emitting products reduce emission during construction and flush-out.
