

United Chair[®] Contributions to LEED[®]

Groupe Lacasse products may contribute to credits of the LEED[®] rating systems. Products that help obtain credits will assist you in achieving your green building goals.

LEED is a building rating system and provides a framework for sustainable design; therefore, LEED criteria are supported by the ways in which products are used and applied to building projects.

To learn more about our products, contact Customer Service at CustomerService@groupelacasse.com or by phone 1-888-522-2773.

United Chair® Contributions to LEED-NC 2.2

Product Name: United Chair® Seating
LEED Rating System: New Construction & Major Renovations 2.2
February 2008

Materials & Resources

Credit 2.1	Construction Waste Management: Divert 50% from Disposal The packaging of our furniture is primarily made of recyclable materials (Corrugated cardboard, polyethylene and polypropylene banding).	1 point
Credit 2.2	Construction Waste Management: Divert 75% from Disposal The packaging of our furniture is primarily made of recyclable materials (Corrugated cardboard, polyethylene and polypropylene banding).	1 point
Credit 3.1	Material Reuse: 5% (Including Building Materials and Furniture) Chairs are designed for a long life and can be refurbished, contributing to this point for future projects.	1 point
Credit 3.2	Material Reuse: 10% (Including Building Materials and Furniture) The flexibility, modularity, and quality of products allow reuse and will adapt to new needs, contributing to this point for future projects.	1 point
Credit 4.1	10% Recycled Content Saggio: 11% Post-Consumer (PC) and 16% Post-Industrial (PI)	1 point
Credit 4.2	20% Recycled Content Saggio: 11% Post-Consumer (PC) and 16% Post-Industrial (PI)	1 point
Credit 5.1	Regional Materials: 10% Extracted, Processed and Manufactured Regionally (500 miles / 800 km) United Chair products are manufactured in Bruce, Mississippi, USA. (No information about extraction)	1 point
Credit 6.0	Rapidly Renewable Materials Fabrics available for chairs are made with rapidly renewable materials such as cotton, wool, or leather.	1 point

Indoor Environmental Quality

Credit 3.2	Construction IAQ Management Plan, Before Occupancy Double Greenguard certification for low emissions. Low-emitting products reduce emission during construction and flush-out.	1 point
