

SHERBOURNE HEALTH CENTRE

Toronto, Ontario

Working with Groupe Lacasse, Sherbourne Health Centre has created an environment that meets all its functional and hygienic requirements — yet looks anything but sterile.

CLIENT QUOTE

"We knew we wanted to work with Groupe Lacasse right from the beginning. We first purchased Lacasse products over eight years ago — and even though it's been reconfigured ten times, it still fits seamlessly with our new workstations. It's almost impossible to tell the difference.

As a health care facility, we only have access to capital money. So whatever we buy, it must be durable. Simply stated, the longer the furniture lasts, the better my decision. Choosing Groupe Lacasse makes me look good!"

JANET GODIN
Facility & Purchasing Coordinator
Sherbourne Health Centre

OBJECTIVE / Opening its doors in 2007, the Sherbourne Health Centre's new facility in southeast Toronto was strategically designed to enhance the care of the community as well as anticipate the health care needs of tomorrow. Besides meeting the distinct needs of a health care facility, Sherbourne Health Centre required a furniture solution that was flexible and built to last.

GROUPE LACASSE SOLUTION / Avenue OPTIONS was specified in four configurations to provide Sherbourne Health Centre with a range of space-planning options. Because the casegoods feature metal-to-metal components, they don't wear out after multiple reconfigurations, which gave Sherbourne Health Centre greater flexibility to accommodate change in the long-term. This also meant that the new workstations integrated seamlessly with existing Groupe Lacasse workstations the facility had purchased eight years ago.

With its streamlined designs and clean edges, the casegoods were also easy to clean.

Groupe Lacasse's 90's Task Seating and Brylee Executive Seating solutions under its United Chair brand were able to support a broad demographic of users — whether they are 4'9" or 6'2". Fabrics were specified as customer-own-materials (COM) in Crypton fabrics to meet the health facility's hygienic requirements.

Groupe Lacasse laminate filing cabinets, featuring a sturdy construction and all-metal cavity, provided a durable option for storage and were colour-harmonized to complement the interior décor.

RESULTS / With extensive experience supporting the healthcare sector, Groupe Lacasse and dealer SCI Interiors, were able to supply more than just furniture to Sherbourne Health Centre. Their understanding of effective health care facility design — and how to maximize a healthcare facility's budget requirements — enabled the team to design a one-stop furniture solution that will work as hard as the Sherbourne Health Centre staff. And will continue to be warm and welcoming over the long-term.
