

**CIDE**  
**CENTRO DE INVESTIGACION  
Y DOCENCIA ECONOMICAS**

*Santa Fe, Mexico*

Supported by Groupe Lacasse products and seating solutions, the CIDE computer centre and library has become the hub of academic life on campus.

## CLIENT QUOTE

"CIDE chose Groupe Lacasse after visiting a former client, the ITAM, where we saw how the Groupe Lacasse furniture withstood use in a much larger library. We were also impressed by the favorable comments we heard from ITAM's librarian regarding Groupe Lacasse's customer service. Groupe Lacasse didn't disappoint. Their product has provided us with flexibility, durability and quality — along with attractive, clean design."

TERESA MYSCICH  
Library Director

## DEALER QUOTE

"The facility was quite dated, and the furniture had simply stopped supporting CIDE's people. Personnel were having to adapt their work habits to the furniture — instead the furniture adapting to their needs. Now, the new building and furniture work together to meet the real-life requirements of a busy library."

OSCAR GOMEZ  
General Director and owner of  
High Density Solutions

## SUMMARY

- United Chair 4800 Seating  
- United Chair 90's Seating  
- United Chair FreeStyle Seating

### TEAM

- Dealer Representative: High Density  
- Design Firm: MN Proyecto y Construccion, S.A.

**OBJECTIVE /** As a centre of research and exploration, CIDE wanted to create an environment that was comfortable for long-periods of study, aesthetically inspiring for brainstorming, yet highly durable to last decades.

**GROUPE LACASSE SOLUTION /** Backed by its vast experience creating product for the educational market, Groupe Lacasse, along with its dealer representative High Density in Mexico City, proposed user-friendly furniture and seating solutions featuring highly durable fabrics and finishes to maximize the comfort of students and staff over the long-term.

Because Groupe Lacasse and High Density were able to provide an integrated solution, CIDE was able to take advantage of higher quality furniture and benefit from a more streamlined installation process overall.

**RESULTS /** Groupe Lacasse and High Density brought to life an interior design concept that invites users of CIDE to explore, experiment and become excited as they engage new information and learning experiences. Ample work-spaces are flexible to accommodate the needs of the modern student well into the future.
