A signature work environment!

Mobiliers H. Moquin surpassed the client's needs by imagining a unique layout concept with a singular visual. For the connected workspaces, the designers opted for Paradigm Panel System workstations. They also used the C.I.T.É. furniture system to create bright and clean open spaces.

For the executive offices, in order to create a more contemporary look, H. Moquin chose our high-end Nex products with knife-edge surfaces and anodized metal framed doors. White and metallic finishes were also chosen to elevate the elegance of the office. Lacasse's electronic lock technology has made it possible to design lockers that meet the specific needs of its users.

Whether for personal or group use, the lockers can be reconfigured easily and quickly. The collaborative and executive areas are also equipped with electrical and communication modules, as well as storage credenzas with integrated bins.

Groupe Lacasse is the perfect solution for furnishing signature workspaces to offer a unique experience to employees and visitors!
